PROFESSIONAL SUMMARY

Frontend Developer and Cybersecurity student based in Dar es Salaam, Tanzania, with hands-on experience building and deploying production web applications. Specializes in responsive, data-driven interfaces using HTML5, CSS3, and modern JavaScript, backed by Firebase for hosting, real-time databases, and storage. Led development on a live e-commerce marketplace platform and an online auction/gallery system, handling UI design, secure data architecture, and performance optimization. Founded a school IT and cybersecurity club, building a curriculum from scratch. Currently exploring AI system integration through personal projects.

CORE SKILLS

- Web Development: HTML5, CSS3, JavaScript (ES6+), Responsive UI/UX Design, Bootstrap
- Cloud & Databases: Firebase Hosting, Firestore Realtime Database, Firebase Storage
- Cybersecurity & Tools: Linux environments, Termux terminal, Git, GitHub version control, API Integration
- Soft Skills: Technical Leadership, Project Management, Rapid Execution, Logical Problem Solving

EXPERIENCE

Lead Full-Stack Developer — Middle Eastern Market Centre (MEM ONLINE)

Web Application — *middle-eastern-market-centre.web.app*

- Architected and deployed a fully functioning production e-commerce and international marketplace web application securely hosted on Firebase
- Configured secure frontend data structures to handle live product showcases, international client requests, and dynamic content delivery
- Optimized application performance and loading speeds by implementing clean, modular JavaScript workflows

Lead Frontend Developer — Taifa Innovations Lab Marketplace

Web Application & Auction Platform Project

- Designed a fluid, responsive online gallery and international auction system using HTML5, CSS3, and modern JavaScript to showcase local artistic creations
- Integrated Firebase Firestore and Firebase Storage handlers to allow seamless product catalog expansion and dynamic card rendering via secure administrative web forms

Founder & Technical Instructor — Tehama Club in Azania (TCA)

Azania Secondary School — Student Organization

- Established the official information technology and computer club at Azania Secondary School, securing approval from faculty and headmaster
- Structured a formal curriculum and timetable to introduce fellow students to foundational web development and practical cybersecurity tools

Developer — JARVIS Personal AI Assistant

Software Interaction Project

- Engineered an automated script integration using microphone hardware inputs and response handling triggers to manage basic audio queries and system notifications

EDUCATION

Ordinary Level Secondary Education (Form Three) — Candidate — Azania Secondary School, Dar es Salaam, Tanzania

- Focused on Science streams, Mathematics, English, and local ICT exploration
